## (54) VIDEO-MONITORING SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To easily specify a concrete road and concrete facilities in a traffic control system and a disaster countermeasure system.

SOLUTION: A digital bird's-eye view map is prepared by viewing a scene in an overlooking direction from a position of a camera 2 by using a 3-dimensional CG technology and is overlapped on video data of the area and a location such as a disaster site is designated and inputted manually on the overlapped picture, so as to automatically specify the data of a point, a road or an area corresponding to the position inputted on the digital map.

## LEGAL STATUS

[Date of request for examination] 26.05.1998

[Date of sending the examiner's decision of rejection] 18.06.2003

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]
